GLOBAL BEAUTY CARE SOLUTION

DERMAKOR

MISSION

We continue to research, develop and design new products in the medical device and aesthetic industries.

VISION

To help aesteticians around the world create, maintain and emphasize the beauty and personality of everyone.

Customer Promise

Honest and faithful partnership.
Safety and effective products at affordable prices.

DERMAKOR
COSMETICS AND MEDICAL COMPANY

GREETINGS FROM CEO

I would like to express my deep gratitude to our customers for their trust and love in DERMAKOR.
We started the aesthetic field in 2010 and founded DERMAKOR in 2018.
In response to the needs of existing customers, the company will continue to expand its business to include aesthetic and specialized medical devices.

We are creating a portfolio of "total aesthetic solutions" to maximize synergy.
DERMAKOR continues to make endless efforts to develop new value-added BEAUTY CARE products through continuous R&D investment.
DERMAKOR further strengthen our partnership based on the superior quality of products and customer confidence to develop into a "Global Beauty Care Company".
We are looking forward to your continued interest and support.
Thank you.

Kind regards, Soo Yong KIM
CEO of DERMAKOR

GLOBAL BEAUTY CARE SOLUTION

DERMAKOR

PARTNERSHIP VISION

Our company successfully cooperate with top Korea manufacturers of Medical Devices and Aesthetics Products.

We provide unique and safe products to our customer worldwide.

We continuously add new and effective brands to our portfolio.

We test, research and upgrade products to provide our distributors only with the best one.

WORLDWIDE PARTNERSHIP

Clients all over the world

DISPOSABLE MEDICAL DEVICE

MIXO

BE BEAUTIFUL
BE EXTRAORDINARY
BE MIXO

Sterile Absorbable Hyaluronic Acid Dermal Filler

MIXO

LIGHT | VOLUME | DEEP

LIGHT **PLUS** | VOLUME **PLUS** | DEEP **PLUS** (with lidocaine 3mg/ml)

Hyaluronic Acid Dermal Filler | 20mg/ml, 1.0ml

MI means Beauty from Korean Hanja and XO is from eXtraOrdinary.

MIXO is premium monophasic hyaluronic acid filler for beautiful and unique people who want to emphasize their natural beauty and individuality.

What is Hyaluronic Acid(HA) Filler?

Safety, biodegradable and biocompatible material.

HA has a much greater capacity to retain water than any other natural or synthetic polymer.

Hydrates, regenerates skin, improves elastin and collagen production.

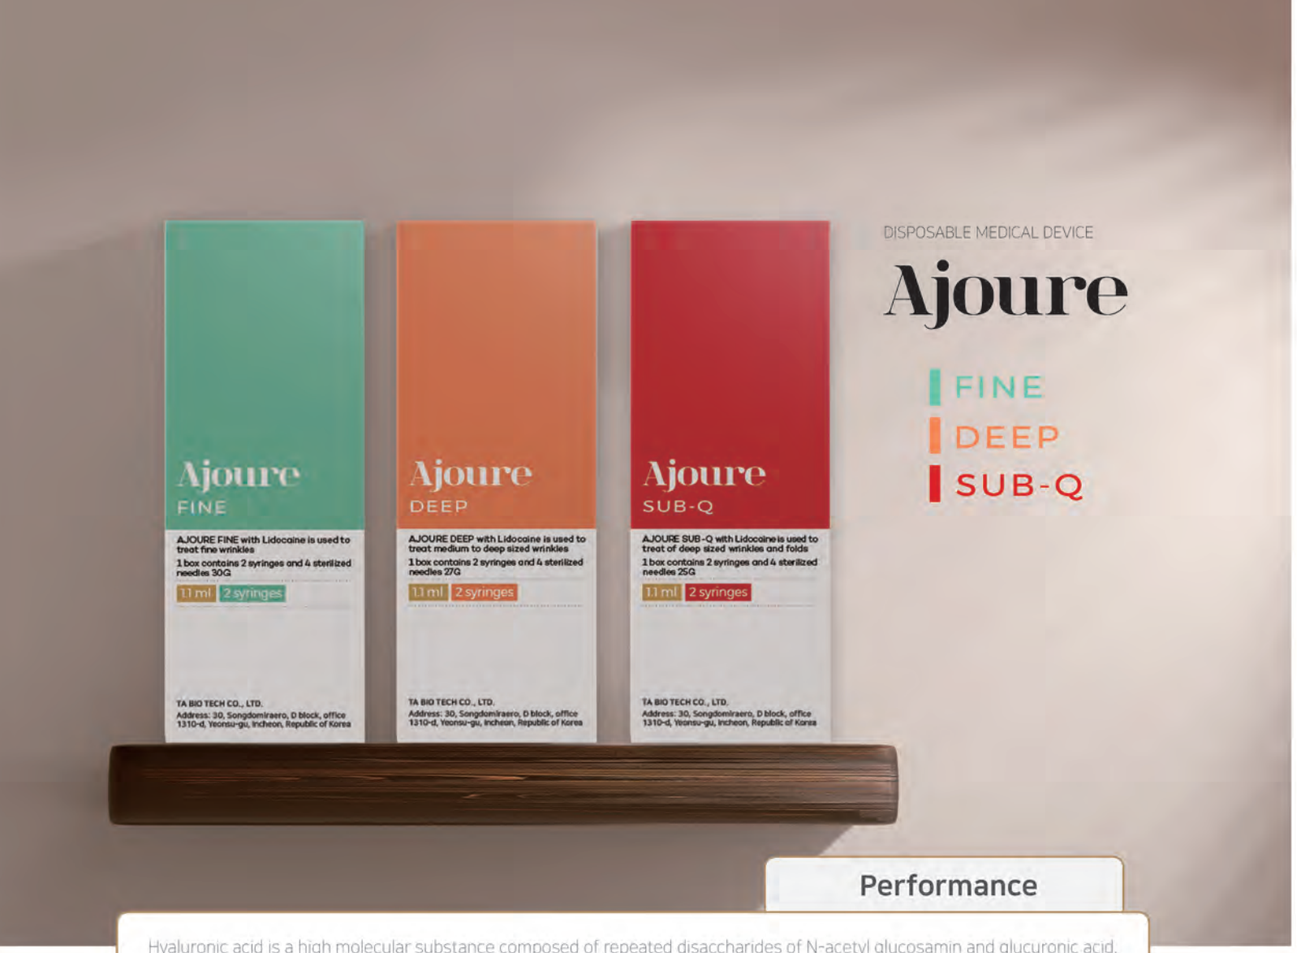
Reduces the appearance of fine wrinkles and returns lost contours of the face.

Can be removed easily and perfectly.

DISPOSABLE MEDICAL DEVICE

Ajoure

FINE	AJOURE FINE with Lidocaine is used to treat fine wrinkles.
DEEP	AJOURE DEEP with Lidocaine is used to treat medium to deep sized wrinkles.
SUB-Q	AJOURE SUB-Q with Lidocaine is used to treat deep sized wrinkles and folds.



DISPOSABLE MEDICAL DEVICE

Ajoure

FINE
DEEP
SUB-Q

Performance

Hyaluronic acid is a high molecular substance composed of repeated disaccharides of N-acetyl glucosamin and glucuronic acid.
Ajoure has realized a stable gel through precision cross-linking technology.
The stable stucture of hyaluronic acid gel fills the space, supports the structure, protects the cell, replenishes the volume of wrinkled skin and keeps it natural.

Safety

The active ingredient used in Ajoure is non-animal.
It is a human-adapted component, contains high-purity hyaluronic acid and naturally decomposed over time.
Hyaluronic acid cross-linking gel can be corrected through hyaluronidase when a problem occurs.
It is safe by providing the level of endotoxin and crosslinking agent below the detection limit through strict manufacturing process management.

Usability

Precisely designed handles and push rods keep the pressure at the time of injection evenly, enabling stable treatment.
The monophasic structure is a regular and stable gel structure, and it is a specialized technology applied to Ajoure that realizes natural volume and soft injection feeling.

Pain relief

Ajoure contains Lidocaine to improve pain-related discomfort during the treatment.

Ajoure

FINE | DEEP | SUB-Q

Product Name	FINE	DEEP	SUB-Q
Injection Site	Superficial to mid dermis	Mid to deep dermis	Mid to deep dermis subcutaneous layer
HA Concentration	24 mg / ml		
Visco-elasticity	Low	Mid	High
Duration	6 - 9 months	9 - 18 months	12 - 24 months
Packaging unit	30G*2	27G*2	25G*2
Injection Area	All facial wrinkles, lip augmentation	Nasolabial folds, forehead, marionette lines and face lifting	Facial contouring, chin and chick augmentation
Syringe Volume	1.1ml * 2syr		
Lidocaine	0.3%		
Shelf Life	24 months		
Storage	Store in 2 - 25℃. Protect from direct sunlight and freezing		

* The durations are depends on age, lifestyle and the skill of a practitioner

MOISTURIZING IN ALL FORMS

Sappire AQUA DROP

SAPPIRE AQUA DROP

STERILE ABSORBABLE MOISTURIZING GEL

2.5ml X 3

What is Sodium Hyaluronate?

Sodium Hyaluronate is a natural substance.
It is present in the body wherever moisture is stored or lubrication between layers of tissue is required to eliminate friction.
It is also used to relief pain due to osteoarthritis of the knees.

Improves signs of aging	Plumps	Repairs damaged moisture barrier
Sodium hyaluronate works to replace lost moisture. This added moisture smooth skin structure by removing fine lines and Wrinkles.	Sodium hyaluronate provides structure and volume creates instantaneous plumpness in the skin.	Sodium hyaluronate is essential for restoring and maintaining. A healthy barrier to prevent transepidermal water loss.

Sappire AQUA DROP is an effective and powerful mesotherapy solution.

- Replenishment of hyaluronic acid deficiency in the skin
- Rstoration of skin elasticity
- Prevention of small wrinkles (decollete, eyes, neck)
- Improving overall skin condition

Single dose of Sappire AQUA DROP is enough to get healthy and radiant looking skin.
Like hyaluronic acid, sodium hyaluronate is incredibly hydrating, but this texture helps to penetrate deeper into skin.

Sappire AQUA DROP	
Ingredient	1 syringe contains 25mg of Sodium Hyaluronate
Product capacity	2.5ml prefilled syringe
Shelf-life	24 months from manufacturing date
Storage Method	Store at room temperature(2°~25°C), avoid light and freezing
Supplied Package	3 prefilled syringes (2.5ml) / pack

Injection Guidelines

Sappire AQUA DROP is injected to a depth of 1.5 mm into the surface layers of the epidermis.
Administration shall be done using a thin gauge needle (30G~32G ½").
Course of Application : 5-7 procedures with an interval of 7-10 days.

SKIN BOOSTER

Sappire PDRN

Skin Booster Sappire PDRN

With Salmon DNA for Skin Regeneration.
5ml x 5vials

SAPPIRE PDRN

The enriched formula is indicated for the prevention and control of signs of aging, regeneration, improvement of the structure and quality of the skin.
Smoothing tone and improves skin elasticity.

- The level of **PDRN** favorably perceived by the body
- Noticeable effect after the 2nd procedure
- Comfortable procedure
- Ease of Use
- Large Volume

ACTIVE INGREDIENTS

Water(Aqua), Sodium Hyaluronate, Glutathione, DNA(Salmon 1.5%), Acetyl Hexapeptide-8, Palmitoyl Pentapeptide-4

Mesotherapy

Sappire PDRN 2,5ml
+
Saline 3 ml

PROTOCOL

Papular injections (micro papulas) of 0.01-0.02ml subcutaneously to a depth of 1.5-2 mm, an interval of 1.5cm.

30G4 or 32G4 needle at an angle of 10-15 degrees; an injector - at a right angle.

COURSE OF APPLICATION

3-5 procedures with an interval of 10-14 days

SAPPIRE S-TOX

Complex of Growth Factors and Vitamins

16 Cell Growth Factors & Antioxidant vitamins

Sappire S-TOX skin booster with 16 Cell Growth Factors & Antioxidant vitamins

5ml x 5 vials | 10ml x 2 vials

SAPPIRE S-TOX

Sappire S-TOX contains 16 ingredients necessary for cell growth factor and promotion of collagen and elastin, reducing wrinkles and maintaining elasticity

- Promoting Collagen
- Elastin Regeneration
- Removes Active oxygen
- Prevents skin aging
- Anti-pigmentation and whitening
- Antibacterial and moisturizing components

ACTIVE INGREDIENTS

Water, EGF, FGF, IGF, Acetyl Hexapeptide-8, Nicotinoyl Tripeptide-1, Naturotics Plus, MultiEx BSASM Plus, Vitamin C, B2, B3, B12, Adenosine, L-Carnitine, Palmitoyl Pentapeptide-4, Palmitoyl Tetrapeptide-7, Hydroxyethylcellulose, Dipeptide diaminobutyroyl benzylamide, Arginine, Arbutin, 1,2-Hexanediol

PROTOCOL

Do not use more than 0.2 cc of Sappire S-Tox ampoule at every (one) point.
The needle depth must be adjusted according to the skin thickness and applicable site. Diagonal 0.2 to less than 1mm.

HAIR LINE SOLUTION

Hair Rich

Sappire Hair Line Solution

Scalp Recovery & 11 Hair Growth Factors

Cleans the scalp and supplies cell growth factors and nutrients.
Promotes hair growth by improving the scalp environment.
Removes active oxygen and prevents scalp skin aging through antioxidant vitamins.
Soothes and moisturizes the scalp and acts as an antibacterial and pore cleaning.

SAPPIRE HAIR RICH

Cleansing and Exfoliating the Scalp

Helps strengthen clean scalp and hair roots by removing impurities and scalp dead skin cells from pores that cause hair loss.

Supply Nutrients for Hair Growth

Helps to create elastic and shiny hair by inducing hair growth by supplying key components for promoting hair growth.

Scalp Cell Activation

Stimulates fibroblasts that make up the scalp, helps improve blood flow, and activates hair follicle cells to help promote hair growth.

Scalp Antioxidant Care

Helps to promote hair growth by activating the cells and preventing the functioning of hair follicles and scalp cells that cause hair loss.

FAT DISSOLVER

SAPPIRE SLIM

Premium Slimming Solution

Sappire Slim Premium PPC Solution

Sappire SLIM Effect of the 4 mixing technologies

10ml x 5 vials

SAPPIRE SLIM

By blocking substances that are transmitted to the nerves to relieve pain.
It regenerates the elasticity of the skin that wrinkles when the fat layer falls off.

- No pain at the injection site
- Rapid effect of lipolysis (Fast effects)
- Prevents wrinkles and aging caused by the inclusion of hexapeptide ingredients

ACTIVE INGREDIENTS

Water, Sodium Deoxycholate, Phosphatidylcholine, Carnitine, Acetyl Hexapeptide-8, Palmitoyl Pentapeptide-4, Palmitoyl Tetrapeptide-7

PROTOCOL

1 point recommended usage
Abdomen/waist (thicker fat layer) : 0.15ml ~ 0.3ml or less
Thighs or hip : 0.1ml ~ 0.15ml or less
Armpit (thinner fat layer) : 0.05 ~ 0.1ml or less
In case of abdomen/waist, 0.15~03.cc on a spot into the fat layer and move to next half an inch or a centimeter distant.

COURSE OF APPLICATION

Repeat this treament 2~3 times(Once every 15 days) | 10ml x 5

DISPOSABLE MEDICAL DEVICE

SAPPIRE LIFT

PDO + | PCL + | PLLA +

Duration of Effect

Material	Duration
PDO	6~8 months
PCL, PLLA	16~20 months
HA+PDO	18-24 months

Advantages of Sappire Lift Mesothreads

- Molding Cog technology allows the best fixation of sagging tissues
- High strength and tensile
- Least invasiveness
- Biodegradable material **PDO(polydioxanone), PCL(polycaprolactone), PLLA(poly L-Lactic acid)**
- All-season use

Indications for Use

- Age changes
- Correction of the upper, middle, lower third of the face. Full Face treatments
- Gravitational ptosis
- Facial contour disorders
- Sagging skin of the face, neck, decollete
- Body lifting - chest, buttock

WORLD'S FIRST HA+PDO MESOTHREAD

HARMONY

Sterile Single Use Polydioxanone suture coated with non cross-linked HA

Disposable Medical Device Non pyrogenic Heavy metal free

Harmony HA+PDO

The New Harmony of **PDO** Thread & Non-Crosslinked Hyaluronic Acid
INCREASE of Tensile Strength : more than 30%
INCREASE of Duration : 3 times, Up to 18 months.
The thread is a scaffold that promotes fibroblast activity. Help to trigger collagen neogenesis in a soft tissue.
Focus of HA Lift is giving efficacy of HA therapy by simple thread implantation.
Unlike liquid type injection, the Harmony thread can be easily implanted in a correct depth with accurate amount.

Hyaluronic acid(HA)

Used as an ingredient in skin care products due to its "unique capacity in retaining water."
HA is therefore a key skin care ingredient when it comes to reinforcing our skin's health, as well as giving it a plump, youthful texture and preventing cutaneous aging.
PDO : most safety and certified material. Helps rejuvenate and promote skin's tightening.

Local anesthesia of the application site

TOPTEN
Numbing Cream

Temporarily Blocks Pain signals along nerves.

[Per 1g contains]
Main Ingredient: Lidocaine(KP).....105.6mg
[Description] White cream
[Dosage & Administration] Apply 0.25-0.66g (23-62mg as lidocaine) to the application site 15 to 20 minutes prior to the procedure for adults.
Wrap in a bandage, to maximize effect.
Do not exceed 2g (184mg as lidocaine) in 24 hours.
[Storage] Store in airtight container at room temperature (1-30ºC)
[Packaging type] 500g/jar
[Shelf Life] 36 months from date of manufacture

Application Area

Dermatology | Surgery | Aesthetic | Tattoo | Semi-permanent

Combination product consisting of a polycaprolactone (PCL) power

POLYBOOST
CL

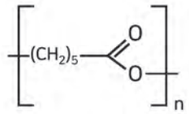
POLYBOOST CL FILLER

PCL 120mg 2.5ml x 1 syringe

POLYBOOST

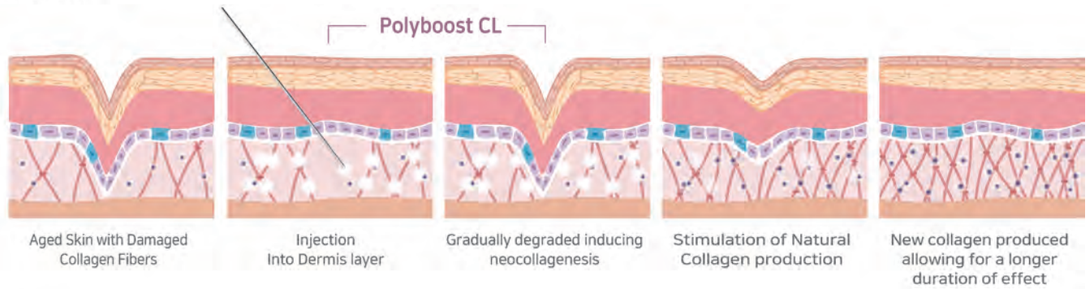
POLYBOOST CL

Liquid PCL 120mg/mL. Equivalent to 90 pcs of monothreads.



- Collagen and elastin production
- Biodegradable medical substance, excreted to water and CO_2
- Non-allergic
- Safe, approved by FDA and CE

Effect



Features

- Stimulated tissues regenerate sub-materials such as elastin, collagen, and amino-peptides, and eventually form new tissue.
- Solubilized **PCL** constitutes the fixed 3D Matrix formation in the dermal layer of the skin with fine volume.
- Continuously promotes tissue proliferation in the skin during the year.
- Fully biodegrades from the human body up to 18 months.

Ingredients

- Liquid Polycaprolactone (nano-scale particles 50-60 micron) - 120 mg
- Non Cross-Linked Hyaluronic Acid - 20mg

Mixture : Polyboost CL 2.5cc + 2% Lidocaine 0.4cc

Mix between 2 syringes using mixing tube

No. of treatments

3 times, 1 procedure/month
Additional 1~2 procedures depending on patient's condition with 4~6 months interval

POLYBOOST CL

Dose

- Face - 2.5-5ml
- Neck - 1.5-3ml
- Body - 2.5-10ml

Injection Technique

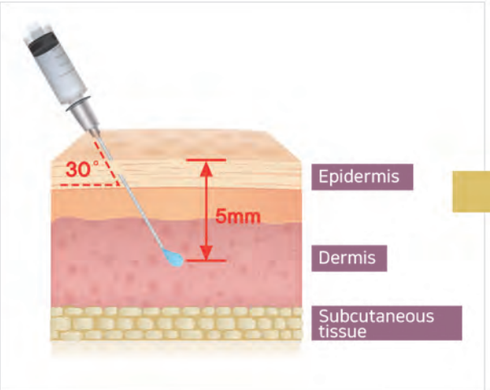
- Multi Injection, 0.02cc per point
- Fanning technique

Application

- Deep Dermis 1.5mm
- 32G4~34G4 mesoneedle
- 23G~27G Filler cannula

POLYBOOST CL treatment photo

Treatment method



Advantages

- Collagen NeoGenesis
- Skin Elasticity Increase
- Minimize Tyndall
- Non Surgical
- Quick Procedure
- Biodegradable

POLYBOOST CL Injection zones

Indication	Whole face
Depth	Upper-dermis
Solution	Polyboost CL 2.5cc +2% lidocaine 0.4cc
Method	Papular, 0.02cc - 0.03cc per injection point

Indication	Crow's lines
Depth	Upper-dermis
Solution	Polyboost CL 0.5cc +2% lidocaine 0.1cc
Method	Papular, 0.02cc - 0.03cc per injection point

Indication	Whole face anti-aging 1. Frown lines 2. Under eye 3. Cheek 4. Nasolabial folds 5. Marionette lines
Depth	Upper, mid dermis
Solution	Polyboost CL 5cc +2% lidocaine 0.5cc +normal saline 7.5cc
Method	Fanning technique with 25G cannula

Micro Beads of Cross-Linked Hyaluronic Acid

Body Filler daarin H10 10cc (10 ml)
Body Filler daarin S10 10cc (10 ml)

Description

Description

Gain a sexy body with the new item DAARIN Body Filler, made of purified cross-linked hyaluronic acid in a 10mL pre-filled syringe.
It is the perfect solution for the natural-looking body profile you've always dreamed of.

We offer top-quality DAARIN FILL Body Filler at a very friendly price.

The body filler consists of 100% cross-linked non-animal hyaluronic acid, created using the precision cross-linking technology, thanks to which it has an instant and visible result, increases the duration of the effect and makes the procedure safe and completely eliminated from the body.
In addition, DAARIN promotes quick recovery and leaves minimal marks after the procedure.
It is best used for shaping the breasts, giving symmetry to the buttocks, and giving volume to skin irregularities.

Application area

Application area

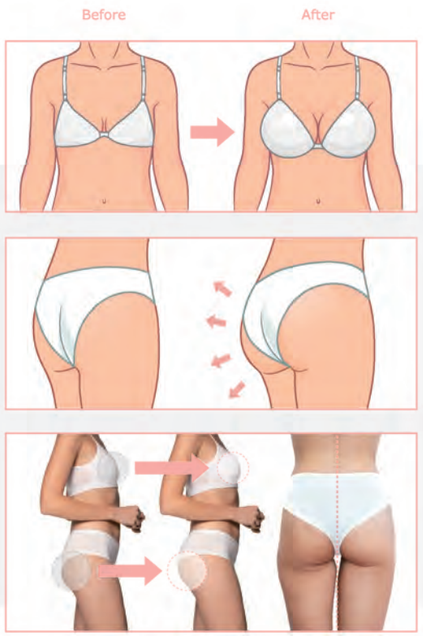
Filler specially designed for volumetric soft tissue replenishment and body contouring

- Correction of the shape and volume of the breast;
- Replenishment of volume and correction of asymmetry of the buttocks;
- Correction of the asymmetry of the legs;
- Replenishment and alignment of soft tissues after volumetric liposuction;
- Elimination of irregularities on the surface of the skin caused, for example, by liposuction.
- Intimate areas

DAARIN Body Filler Benefits

DAARIN Body Filler Benefits

- It provides quick and long-term effects
- It is an ideal alternative to surgical interventions
- It can avoid complications such as scarring
- It is made of purified, stabilized hyaluronic acid obtained by a patented biotechnological method.
- It does not require anesthesia as the procedure is virtually painless
- It contains anti-aging properties that can naturally radiate youthfulness to the skin.



- Body contour
- Buttocks enhancement
- Breasts enlargement
- Hyaluronic acid ingection
- Long lasting time
- No downtime
- Immediate result
- Non surgerical

DAARIN Body Filler Benefits

CE.ISO.MSDS OK	Long durability OK	No animal ingredients OK
Natural Looking OK	No skin test needed OK	Biodegradable, non permanent OK

Point recommended usage

DAARIN Body Filler Efficiency

A single application of **DAARIN** Body Filler provides an effect lasting 12-15 months, and with delicate care up to 2 years.
The gel, which is biologically compatible with the human body, gradually dissolves in the process of metabolism.
To ensure the effect for a longer period and to maintain the aesthetic result, it is possible to repeat the procedure.

How long until the results appear?

The skin's volume appears restored almost immediately, with optimal results a day or two after the treatment.

FORMULATION

DAARIN BODY FILLER – 10mg/mL HA
Each mL consists of 10mg of concentrated and purified hyaluronic acid.
The gel is devoid of any animal toxins that may cause allergic reactions because it was processed through the innovative HENM cross-linking biotechnology method.

PACKAGING

PACKAGING AND SPECIFICATIONS

1 syringe × 10 ml per pack ---
protocol: Subcutaneous and intradermal injection
Needle size: 30G
Shelf-life: The product must not be used past its expiration date.
Please check the package for reference.
Storage: Stored at room temperature (2°C-25°C) and kept away from direct sunlight and freezing

Country Of Origin: Republic Of Korea

FILLICIA MICROSPHERE FILLER

FILLICIA

FILLICIA 200,1000

FILLICIA 200mg,1000mg / 1 vial

Product	FILLICIA 200	FILLICIA 1000
	PLA + HA	
Main ingredients		
	Poly(D,L-lactic acid),(PLA)	
Dosage & volume	200mg / vial(box), 150mg PLA + 50mg HA	1000mg / vial(box), 750mg PLA + 250mg HA
Layer/Effect	Wrinkle improvement to Subcutaneous, dermal layer	
Particle Distribution (Average)	Average 30pm	
Storage	Store at room temperature below 30°C, do not freeze	
Duration	12 months	

FILLICIA

FILLICIA 200, 1000

Fillicia is a product designed to enhance facial and body volume by stimulating the regeneration of autologous collagen.
Its main ingredient is high-molecular lactic acid, which is extracted from sugar cane and synthesized into polylactic acid monomers.
This fourth-generation powder filler maximizes the long-lasting volumizing effect.

FILLICIA
MICROSPHERE FILLER

Natural Volume

- Achieve Natural Volume.
- Microparticles are perfectly spherical and uniformly sized, providing even collagen stimulation. Ideal for patients with thin skin and fine wrinkles, they deliver a natural and harmonious look.

Control of Absorption

- Precise Absorption Control.
- Uniformly sized at 30 μm microparticles, allowing, for controlled absorption.
- Results a long-lasting effect up to 18 months, offering sustained benefits to the patient.

Control the Duration

- Stable Shape for Natural Biodegradation
- Maintain a stable shape, ensuring constant biodegradation into harmless CO_2 and H_2O in the body.
- Non-interacting nature prevents collagen clumping, resulting in a smoother and more reliable outcome.

Safety Materials

- Proven Safety and Biodegradability
- Materials are widely known as a raw material for lifting threads, rigorously tested and confirmed safe for collagen stimulation.
- Biocompatible and fully biodegradable, ensuring both patient safety and eco-friendliness.

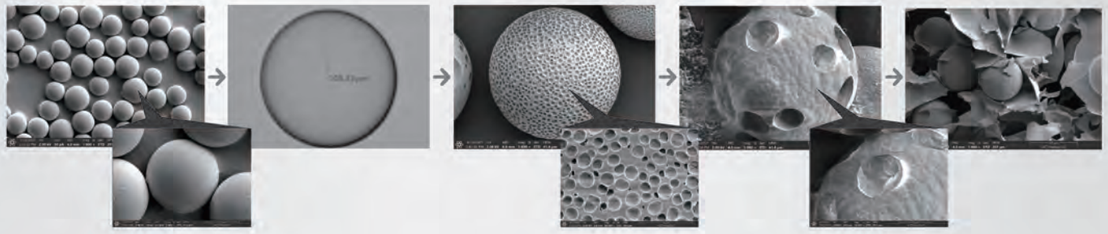
What is Microsphere?

Tiny Spherical Fine Particles: A Vital Component of the 4th Generation Filler for Natural Collagen Stimulation in the Body.
High molecular microsphere powder fillers stimulate skin tissue regeneration, naturally reducing wrinkles.

Unique Platform Technology	Controlled Degradation	Customizable solutions for specific needs
Groundbreaking platform technology enables large-scale production of perfectly spherical particles with consistent size.	Tailored microsphere production, precise control over degradation rates within the body.	Pharmaceuticals, medical devices, cosmetics.

Porous microparticles

1. Particles are adjusted by filtering technology to the consistent and appropriate size.
2. Production of fine particles with many pores on the surface for the better absorption.
3. Faster collagen stimulation and biodegradation.

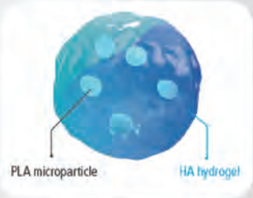


FILLICIA

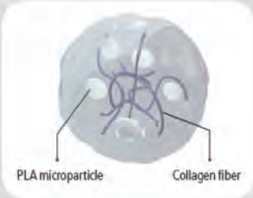
FILLICIA 200, 1000

Effect

Continuously promotes tissue proliferation in the skin during the year.
Effective in treatment of scars, stretch marks (striae).



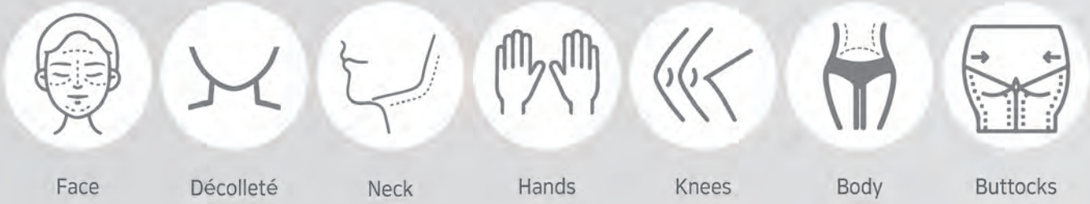
Improving skin turgor, removes fine wrinkles, moisturizes, return lost volumes, long lasting lifting effect, scars removal, pores tightening.



Stimulated tissues regenerate sub-materials such as elastin, collagen, and amino-peptides, and eventually form new tissue.

Some volume loss occurs during 1-2 weeks after injection.
The production of cell and collagen restores lost volume at week 3-4 after injection.

Possible correction areas



Features

- Dissolves in 20-30 minutes
- Homogeneous substance after mixing
- Easily injectable, Biocompatible.
- Fully biodegrades from human body up to 24months.
- Spherical shapes 30 micro in size.
- Should be mixed with liquid diluent before the procedure.

No. of treatments

3 times, 1 procedure/month

Ingredients

Mixture	
Sodium Chloride(Sterile Water)8ml + Lidocaine 2cc.	Sodium Chloride(Sterile Water)17ml + Lidocaine 2cc.

Dilution time over 30min

Cross-Linked Hyaluronic acid

Zentia

1 box contains 3 syringes needles 25G / 1.1 ml 3 syringes

Zentia

SPECIAL | PREMIUM

Performance

Hyaluronic acid is a high molecular substance composed of repeated disaccharides of N-acetyl glucosamin and glucuronic acid.
Zentia has realized a stable gel through precision cross-linking technology.
The stable stucture of hyaluronic acid gel fills the space, supports the structure, protects the cell, replenishes the volume of wrinkled skin and keeps it natural.

Safety

The active ingredient used in Zentia is non-animal.
It is a human-adapted component, contains high-purity hyaluronic acid and naturally decomposed over time.
Hyaluronic acid cross-linking gel can be corrected through hyaluronidase when a problem occurs.
It is safe by providing the level of endotoxin and crosslinking agent below the detection limit through strict manufacturing process management.

Usability

Precisely designed handles and push rods keep the pressure at the time of injection evenly, enabling stable treatment.
The monophasic structure is a regular and stable gel structure, and it is a specialized technology applied to Zentia that realizes natural volume and soft injection feeling.

Pain relief

Zentia contains Lidocaine to improve pain-related discomfort during the treatment.

1ml x 1 box contains 1syringe
needles 25G,27G,30G

Sensfill

Why Choose Sensfill?

What is Sensfill Hyaluronic Acid Filler?
Safety, Biodegradable and biocompatible material
HA has a much greater capacity to retain water than any other natural or synthetic polymer.
Hydrates, regenerates skin, improves elastin and collagen production.
Reduces the appearance of fine wrinkles and returns lost contours of the face.
Can be removed easily and perfectly.

PRODUCT INFORMATION

Local anesthetics

Product Description

TOPTEN PRO is an anesthesia cream made to deal with pain deriving from tattoos, piercings, permanent make-up or similar treatments. During these kind of treatments, most people experience pain and in most cases, the pain is what is most feared about getting these treatments. But with the TOPTEN PRO cream , you can undergo most on-skin treatments without pain. If you are considering treatments as mentioned above, or anything alike, you no longer have to worry about the pain during and after the session due to the anaesthetizing effect of the numbing cream. With TOPTEN PRO cream, you will be closer than ever to the tattoo of your dreams.

TOPTEN PRO

Specification

Packaging type : 450g/Jar
Appearance: White Cream
Main Ingredient : Lidocaine 2.5 %, prilocaine 2.5%
Shelf life : 36months from the date of manufacture
Efficacy : Anesthetic cream, mainly used for tatoo operation, laser operation, semi-permanent make-up, MTS operation, filler operation, etc.
Store: store in airtight container at room temperature(1-30℃)
Country of Origin : Republic of Korea

"Genuine-Quality" Topical Anesthetic Cream for Numbing Targeted Areas

A Safe and efficient way to temporarily stop pain signals without injection

Simple Use
Easy to achieve powerful anesthesia without special skill or tools

Non-irritant
Safe with internationally commercialized ingredient composition

Pleasant Texture
Pleasant use with odor-free, non-sticky&water-soluble formula

Stable Form
Strong thermal resitance technique preventing phase separation

Safe-Quality
Made in korea product strictly complying with GMP guidelines

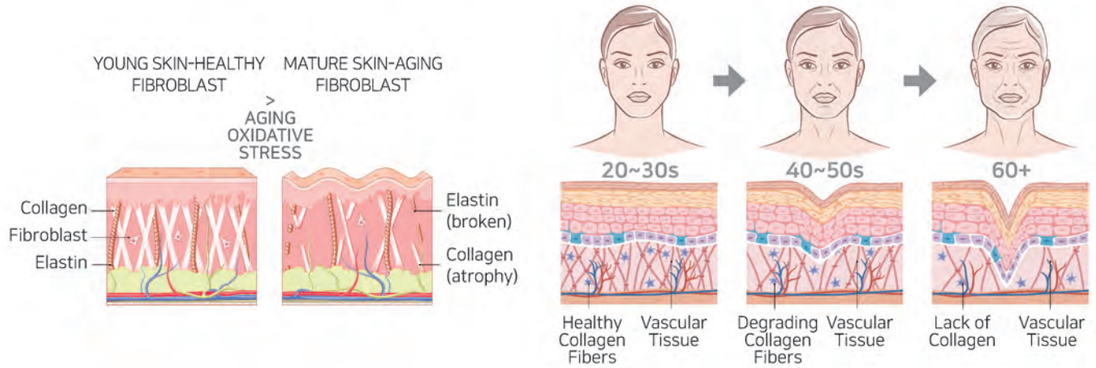
Application Area

Dermatology | Surgery | Aesthetic | Tattoo | Semi-permanent

COLLAGEN STIMULATING SOLUTION

PL I 100mg + PL II 6ml

flawless skin is an **important** component of **facial** attractiveness and continues to be one of the most universally **desired features**



Stimulation of fibroblasts, major cells in skin tissue for collagen, elastin and hyaluronic acid is main key to healthy, beautiful and young skin.

Why BVRS PL?

BVRS PL is effective rejuvenation complex deals with main anti-aging problems.
Contains components for fibroblast activity stimulation and improves skin quality.
Preservative-free, surfactant-free freeze dried powder simply mixed with liquid collagen booster solution before the procedure for the better effect.
Creates an ideal conditions for fibroblast activity

Main ingredients

Polylactic acid 10 mg/ml and 50 kinds of skin nutrients boost collagen, elastine, hyaluronic acid stimulation in the skin tissues.

PL I – PLA Collagen Stimulator	PL II – Skin Boosting Solution
Uniform spherical PLA particles produced by Unique Smart SPDS technology:	Liquid sterilized activator contains 50 kinds of skin nutrition ingredients:
• Collagen stimulation effect • Elastine production • Skin tissue strengths • Freeze-dried formulation • Sterile, endotoxin free medical poly-lactic acid	• for skin revitalizing • cell regeneration • whitening • skin texture improvement • hydrolyzation

Polynucleotide

1syringe | box

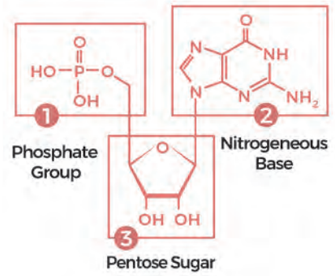
Increased skin density (increased thickness)

- Oil-moisture balance control (moisturizing, sebum reduction, dead skin cells reduction)
- Pore reduction, scar relief
- Skin tone purification (dullness, redness improvement)
- Increased skin elasticity (improvement of fine wrinkles)
- Volume increase effect (3D matrix formation)

What does PN (Polynucleotide) mean?

Polynucleotide

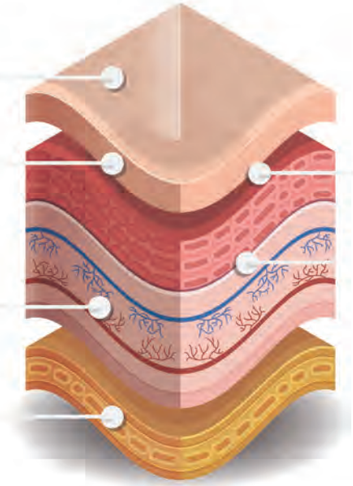
A piece of long DNA among PDRN (Polydeoxyribonucleotide) made by cutting DNA to a certain size The most similar (94%) to the human base composition.
A specific nucleotide extracted and purified from the testes of salmon.
Very safe substance that is very stable to heat and does not show foreign body effects.
Activates the healing ability of the skin to improve the environment inside the skin and restore the skin structure.
It restores normal skin tissue damaged by aging, UV rays, skin toxins, and skin irritation by increasing skin elasticity by making the epidermis and dermis healthy and thick.



What kind of problems PN solve?

Skin regeneration

Anti-aging



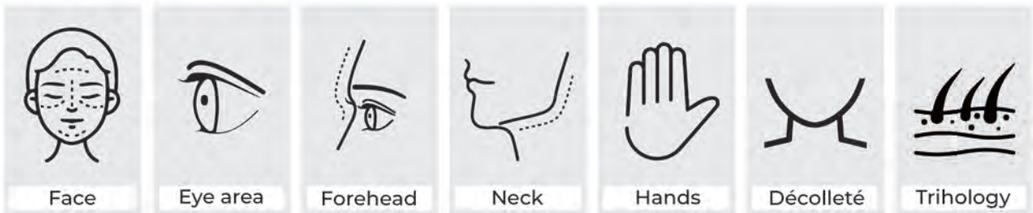
Improving the environment in the skin

Increasing the thickness of the epidermis and dermis

Promoting the production of collagen and elastic fibers

Restoring aged and damaged skin

Improvement of rough skin and fine wrinkles

Hydration effect


Areas of application:
